

Hygiene walls

Through the stylish use of acrylic and *mezzo light* profiles you are able to create hygiene and protection walls or temporary structures for supermarkets, pharmacies, bank counters, nursing homes that are ideally suited for attending your clients and administer the COVID-19.

mezzo's flexible modular construction makes it easy to assemble and dismantle objects in no time at all. This, combined with the small amount of space required to transport and reconfigure the system.

This gives you a flexible solution, ideally suited for temporary facilities.

Keep your options open.

Insist on the advantages of *mezzo system*.
